Subject: Fwd: Invitation: Uinta Basin Stakeholder Meeting September 17, 2015

Kathy, Michelle, and Matt,

EPA is having a stakeholder meeting on the Uinta Basin - what controls to include in their FIP for the tribal lands (and that we will include in our rules for state lands). We are trying to work together to be sure that where an operation in the basin is sited (tribal/federal or state land) will not impact the controls installed or how they are operated. This is similar to some work we are doing with a new inventory that we all sent out - it went to everyone in the basin, with an expectation that we will get a much more comprehensive inventory of oil/gas equipment in the basin than we have heretofore obtained. All of that information will be housed here at DEQ, but owned/shared with the tribe and EPA.

I didn't see your names on this "to" list. We (Utah) will be attending through the web - and thought you or others you know might like to participate.

If you would like to participate, the connection information is contained in the emails below. If you know of others who you feel might like to participate, please convey this information to them, as well.

Thanks.

Dave McNeill, Manager
Planning Branch
Utah Division of Air Quality
Office: (801) 536-4037
Cell: (801) 413-8494

Good Morning – For those of you unable to attend the Uinta Basin Stakeholder Meeting on September 17th in person, the meeting will be available via Adobe Connect, so that attendees will be able to view the slides.

Please click on the link below to join the meeting, type in your name as a Guest and click on the "Enter Room" button. You will also need to call-in to the meeting via the Conference Number.

If you have any questions, please feel free to contact me at the number below or via email. Thank you.

Meeting Name: Uinta Basin Stakeholders Meeting

Summary: The purpose of this meeting is to gain input as to which Control Technique Guidelines would be most appropriate, practical and cost-effective to include in a potential rulemaking in the Uinta Basin. We are also interested in new ideas for control strategies for equipment that are not yet part of state or federal requirements.

When: 09/17/2015 9:00 AM - 12:00 PM

Time Zone: (GMT-07:00) Mountain Time (US and Canada)

Call-in:

Conference Number(s): Ex. 6 - Personal Privacy

Participant Code: Ex. 6 - Personal Privacy

To join the meeting:

<https://epa.connectsolutions.com/uinta/>

If you have never attended an Adobe Connect meeting before:

Subject: Invitation: Uinta Basin Stakeholder Meeting Sept. 17, 2015

Dear Sir or Madam,

EPA Region 8 invites you to a meeting at EPA's Denver offices on September 17, 2015 from 9 a.m. to 12 p.m. As an interested party in the Uinta Basin, you are an important stakeholder in EPA's consideration of developing an Indian country-specific rulemaking on the Uinta and Ouray Indian Reservation. The purpose of this potential rulemaking would be to achieve volatile organic compound (VOC) emission reductions at existing oil and gas sources located in Indian country. This rulemaking would be implemented in advance of the 2017 ozone designation process, in time to achieve early VOC emission reductions and improve air quality in the Basin.

On August 18, 2015, the EPA Administrator signed proposed Control Technique Guidelines (CTG) for existing Oil and Gas Operations (<http://www.epa.gov/airquality/oilandgas/actions.html>). These CTGs largely mirror the current and proposed New Source Performance Standard (NSPS) Subpart OOOO requirements for new oil and gas sources. As you may know, there are approximately 9,000 oil and gas wells with associated equipment operating on Indian country in the Uinta Basin which pre-date NSPS subpart OOOO and are operating without federally enforceable emission controls. In addition to Utah's rules for existing sources, EPA is considering using the CTGs as a basis for our possible Indian country-specific rulemaking, to create a level playing field in the Basin.

The goal of the September 17th meeting is to gain your input as to which CTGs would be most appropriate, practical and cost-effective to consider in potential rulemaking. We are also

interested in new ideas for control strategies for equipment, such as dehydrators, that are not yet part of state or federal requirements. Staff from the Utah Division of Air Quality and the Ute Indian Tribe will also be attending, as we move forward together to address VOC emissions from existing oil and gas sources in the Uinta Basin.

If you know of someone who would be interested in attending, who is not listed above, please forward this invite to them.

Please RSVP to me at ostendorf.jody@epa.gov or [303 312-7814](tel:3033127814) by September 15, 2015. The agenda is attached.

Thank you,

Jody
